ArabPlast 2023: Uncover Groundbreaking Technologies That Are Reshaping The Plastics, Petrochemicals And Allied Industries For A More Sustainable And Resilient Global Ecosystem

Q. Al Fajer has been a pioneer in organizing trade fairs and exhibitions for almost 5 decades now. Your comments on how the organization has evolved during this journey.

Al Fajer Information and Services was established in 1975 at the time when Dubai was heading towards rapid economic growth under the guidance of its visionary leaders. Initially focused on exhibition organization, it quickly gained recognition

ArabPlast 2023 Spotlights UAE's Commitment To Sustainable Practices, Circular Economy And Tech Progress In Plastics

Mhd Rachid Mbayed
ArabPlast Exhibition Manager,
Al Fajer Information and Services

ArabPlast is a gateway to the latest innovations in plastics, recycling and allied industries. It has consistently served as a global hub, showcasing advancements in industrial growth and sustainability. The 2023 Edition will highlight UAE's commitment to environmental sustainability, circular economy practices and technological

progress, especially in plastics and petrochemicals. It is a platform under a single roof for stakeholders in the plastics, recycling, petrochemical, packaging and rubber sectors to come together, exchange ideas and discover new opportunities. ArabPlast offers the chance for you to explore a wide range of cutting-edge technologies, products and services that reflect global dedication to

Science that betters your everyday

NIR Detectable Masterbatches:
Detectable by Design

Designed for circularity, JJ Plastalloy's NIR Detectable Black allows plastics containing these masterbatches to be sorted using conventional NIR sorting equipment.

JJ Plastalloy is the first Indian masterbatch specialist to introduce NIR Detectable Masterbatches in the country with valid COTREP certification.

Messe Düsseldorf has been a strong partner to the global plastics and rubber industry for over 70 years now. We have built up international expertise in the plastics and rubber sector, particularly as the organiser of K in Düsseldorf, the world's number one event in the sector.

We are very proud that our work has led to a long-term partnership with Al Fajer Information and Services. Cooperation could not be more pleasant and fruitful!

ArabPlast is the ideal platform for producers, processors and recyclers of plastics and rubber products to network, explore current market trends, and establish new or expand existing business contacts.

We are delighted to have organised such a strong German presence at ArabPlast 2023. 55 renowned German companies will be showcasing their innovations and cutting-edge technologies in the German Pavilion.

I strongly recommend you not to miss the German Pavilion in Hall 2 as well as the other international pavilions from Austria, Italy and Turkey, because they demonstrate the operational excellence of the industry and can actively set the course for the future together with you, the visitors.

Al Fajer And Messe Düsseldorf: A Strong Partnership For The Success Of ArabPlast!

Rubber

We are delighted to have organised such a strong German presence at ArabPlast 2023. 55 renowned German companies will be showcasing their innovations and cutting-edge technologies in the German Pavilion.

SOLUTIONS FOR TOMORROW

MORE THAN 25 YEARS COLLIN MANUAL PRESSURE FILTER TEST

The manual COLLIN pressure filter test is used for determining quality differences in a polymer caused by agglomerates, insufficiently dispersed fillers resp. contaminations.

Your Advantages

- ▶ **User-friendly.** Easy and safe handling.
- ▶ **Measurable.** Improved reproducibility by double chamber hopper.
- ▶ **Time-saving.** Low idling times during screen change due to cassette system.
- ▶ **Sophisticated.** Filter change without extruder stop.

Hi-Tech Machinery Presents Cutting-Edge Solutions In Plastics Manufacturing At ArabPlast

Habib ur Rehman
CEO,
HiTech Machinery General
Trading L.L.C

Q. Could you elaborate on Hi-Tech Machinery's range of products and services, particularly in the areas of injection molding machines, rubber and plastic auxiliary machinery, and extrusion blow molding machines?

Hi-Tech Machinery is a destination for quality machines and post-sales services related to the plastic manufacturing industry. We are focused in:

- Servo hybrid injection machines (UWA, JSW Partner since 1995).
- PET blow solutions.
- Extrusion blow molding (YIJU).
- Extrusion lines (JINHU).
- Auxiliary machinery i.e. Hopper dryer, auto loader, chillers, granulator (HUARE).
- Screw air compressors (JV JAPAN Anest Iwata).
- Piston air compressors.
- Screw barrels (Dimaji).
- Robots and IML solutions (YANGSON).

Q. As a distributor in the plastics manufacturing machinery sector, what are the main trends and challenges you see in this industry?

The major challenge any distributor may face is the adaptability of the latest technology. The UAE market is still far behind Europe and China in adopting the latest innovative solutions.

“As a machinery supplier and services provider, HiTech is introducing the latest technology with minimized running costs and high-efficiency machines. At ArabPlast 2023, we are displaying energy-saving servo hybrid machines, all-electric high-speed machines with low cost and high efficiency,” shares Habib ur Rehman, in dialogue with POLYMERS Communique.

Industrialists are still using old technology in manufacturing, and HiTech is committed to helping them enhance their ability and introduce them to international markets.

Q. Given Hi-Tech Machinery's active participation in ArabPlast 2023, what new innovations and solutions are you showcasing?

As a machinery supplier and services provider, HiTech is introducing the latest technology with minimized running costs and high-efficiency machines. We are displaying energy-saving servo hybrid machines, all-electric

Carbokene FZE, Sharjah Offering Polymer Solutions And Masterbatch Expertise

We, Carbokene FZE, are a masterbatch manufacturing and plastic materials supplying company, located in Sharjah, UAE. Our long experience in polymers gave us the opportunity to deal with the biggest players in the plastic industry worldwide, as our

strength stems from our clients' trust.

Being a trader, we must add value to the business; hence in Carbokene, we believe that honest, straightforward business practices combined with the best service are the shortest way to customer satisfaction.

Carbokene, with over a decade of experience, is committed to providing the best quality of materials to hundreds of customers worldwide. We export to many countries, having existing clients in South East Asia, Far East Asia, Europe, the Middle East and Africa. By offering a wide range of polymers in all forms, we always look to attract professionals with extensive experience in this dynamically growing industry.

“

Carbokene is committed to providing the best quality of materials to customers worldwide. We export to many countries, having existing clients in South East Asia, Far East Asia, Europe, the Middle East and Africa.

continued from page 3

high-speed machines with low cost and high efficiency.

Q. Can you discuss the turnkey solutions and how do these solutions benefit the plastics molding industry?

HiTech Machinery is introducing turn-key projects in the vast field of plastic manufacturing. We are providing complete solutions for the construction industry and introducing turnkey projects for PPRC, PVC and HDPE pipe industry.

Keeping in view the high demand for disposable food items, HiTech Machinery, with their expert engineering, is introducing complete solutions like disposable thin wall food containers, disposable glasses and spoons.

In the growing sector of dairy products, HiTech is providing solutions for fast-moving items like yogurt, labneh and milk buckets. By adopting our technology, one will be able to meet the market demand by minimizing their overall costs and the product will be more presentable in the international market due to its efficient finishing.

Talking about the water industry, it is one of the fastest-growing and demanded industries in the whole Gulf and African countries. We have introduced the market with an innovative solution which will help industrialists achieve 5 times more production than ordinary machines and old technologies.

For the medical industry, mostly medical items are being imported from Europe. By analyzing the market demand, HiTech has introduced fast and productive technology for syringe making at low cost and within a good budget.

Bottom line, we are introducing game-changing innovative technology along with our engineering support to the entire Gulf, South Asia and African regions and we are looking forward to adopting the new market trends in international markets.

PLEXCONCIL Extends A Welcome To All; The India Showcase At ArabPlast Is Truly Overwhelming

Hemant Minocha
Chairman,
PLEXCONCIL

Sribash Dasmohapatra
Executive Director,
PLEXCONCIL

On behalf of The Plastics Export Promotion Council of India (PLEXCONCIL), we extend a warm welcome and heartfelt greeting to all participants of ArabPlast 2023. This prestigious event that is scheduled to take place at the Dubai World Trade Centre in Dubai, UAE, from the 13th to the 15th of December 2023 marks an important milestone in the global plastics industry calendar and we welcome the opportunity that it provides for the Indian plastics processing industry to showcase its manufacturing prowess once again to a global audience.

The United Arab Emirates stands as the third-largest destination for Indian plastics, demonstrating leadership in fostering a new era of business networking for global trade. The 16th edition of ArabPlast, recognized as the premier international exposition the plastics, recycling, petrochemicals, packaging and rubber in the Middle East, serves as a cornerstone for the plastics industry and India's participation in ArabPlast is of paramount importance, positioning itself as a key trade window to the Middle East region.

According to our data, the Middle East region imported plastics worth USD 38 billion in 2022, with India's share accounting for 4.7% (USD 1.7 billion) of the total. Recognizing

ArabPlast 2023 Spotlights UAE's Commitment To Sustainable Practices, Circular Economy And Tech Progress In Plastics

Mhd Rachid Mbayed, ArabPlast Exhibition Manager, Al Fajer Information and Services

continued from page 1

Al Fajer Information and Services is delighted to unveil the 16th edition of ArabPlast, the Middle East's Premier Trade Show for the plastics, recycling, petrochemicals, packaging and rubber industry. The event is scheduled from December 13th to 15th, 2023, at the Dubai World Trade Centre.

sustainable progress. Furthermore, it offers an exceptional occasion to establish connections and network with industry leaders, innovators and experts, while gaining insights into the transformative journey of these industries.

The UAE government is making significant progress in plastic recycling and is investing heavily in modern technologies and infrastructure, making the region a leader in sustainable waste management. The idea of a circular economy, where we not only recycle, but also reuse and reduce waste is catching on!

The ArabPlast team extends their heartfelt appreciation to all exhibitors and visitors who will be part of this exceptional event. Your participation underlines UAE's unwavering commitment to industrial growth and a sustainable future.

Shibaura Machine India: Expanding Horizons At ArabPlast To Further Its Market Reach

S. Narayanaswamy
Head - International Sales,
Shibaura Machine India Pvt. Ltd.,
Chennai

Q. How would your upcoming expansion help you better cater to the needs of your domestic and overseas business?

Expansion of the capital base has always been considered a big positive for sales, as it offers multiple avenues for booth product line and range expansion. In a way, this also helps in reducing delivery lead times and achieving economies of scale, enabling the offering of more competitive products. I'm sure, going ahead, the product portfolio of Shibaura Machine India will be very strong, and we will be open to offering machines to the European as well as American markets once again.

Q. How do you see the future of all-electric injection

molding equipment?

The adoption of all-electric injection machines offers a paradigm shift in the way factories are being set up as well as the way they are functioning. They become more efficient and effective. Additionally, they provide significantly less hassle in operations, bringing in the much-needed enhancements in production. The use of these machines also requires lower floor space, apart from the much visible benefits of lower running costs, power and water savings, and hence, a reduced carbon footprint. The future is now and here!

Q. Do you see AI making inroads into your business? If yes, how? If not, why not?

We anticipate tremendous increments in AI adoption in

the near future across multiple avenues in companies like ours. Needless to say, we have already started using AI tools in marketing and our R&D in this very short time. IoT is another area where AI will make deep inroads as the data from multiple machines can be put to great use by means of adopting novel methods to reduce the cost of production and, at the same time, ensure that there will be maximum

transparency and uptime of the molding machines. It will be interesting to see how companies will compete with the adoption of AI, as this could reduce the differentiation between them if they are willing to adopt technology quickly. It also means that information available to larger companies could be available to smaller ones at a fraction of the cost. This is one area where the early bird is evident to strike high.

the immense growth opportunity for our nation's plastics industry, PLEXCONCIL has earned a stellar reputation for establishing exporters' trust by bringing together a contingent of plastics industry stakeholders under the India Pavilion at ArabPlast. With the support of the Ministry of Commerce and Industry, Department of Commerce, Government of India, PLEXCONCIL

is making concerted efforts to assist Indian plastics producers in understanding and exploring export potential for deeper market penetration in the Middle East.

We extend our best wishes to the exhibitors from across the globe who are showcasing their products and services at ArabPlast 2023. Furthermore, we extend our congratulations to the

Fajer team for their continued support. As their exclusive alliance partner in India, we look forward to collaborating with Al Fajer in furthering our mutual interests for many years to come.

We send our sincere greetings to all participants presenting their products and services at ArabPlast 2023. India's involvement in ArabPlast underscores its significant role as a crucial trade gateway to the Middle East region.

Shibaura Machine India: Expanding Horizons At ArabPlast To Further Its Market Reach

S. Narayanaswamy, Head - International Sales, Shibaura Machine India Pvt. Ltd., Chennai

continued from page 7

Q. What kind of growth do you envisage in your auxiliary business?

The auxiliary equipment business has become highly competitive. We would target the material conveying system business, as direct sales of unit equipment do not benefit larger companies like ours. This business would be channelised through our partners. We have continuously enhanced our range and also added a lot of new products in the past couple of years to stay ahead in the market and offer competitive solutions to our customers. Our

strength mainly lies in offering complete solutions of injection molding machines and auxiliary equipment for our clients, especially in the area of greenfield projects where customers rely on a single vendor to satisfy their complete plastic molding requirements.

Q. The importance of participating in ArabPlast as a platform for business expansion in the MEA; your expectations / strategy to maximize benefits from this participation.

This is our second participation

in ArabPlast, after our attempt a decade ago. Back then, the market was not expansive and was limited to only a few applications.

Over the past five years, we have made significant inroads into the UAE and other Middle East markets. We have added numerous clients who appreciate our machinery and have a preference for Japanese technology. We are delighted to work alongside our customers and to grow with them. Our goal is to continue

“Over the past five years, we have made significant inroads into the UAE and other Middle East markets. We have added numerous clients who appreciate our machinery and have a preference for Japanese technology,” conveys S. Narayanaswamy, in dialogue with POLYMERS Communiqué.

with this good work and offer our products and services, as well as provide the right advice to anyone seeking to enter the plastics molding business.

Masterbatches Related To Circular Economy And Sustainability Drive The JJ Plastalloy Showcase This ArabPlast

Shivam Bansal
Director,
JJ Plastalloy Pvt. Ltd.

Q. The packaging industry has contributed significantly to the growth of masterbatches over the years. How do you see this?

With the increasing trend of departmental stores, more ready-to-eat products, online shopping, more hygiene, better brand visibility and convenience in handling, the contribution of packaging has increased tremendously and it will continue to grow in future. Nowadays, in order to differentiate and offer something extra to the consumers, all brands are working to make packaging more attractive, with better barrier properties and light-weight. To a large extent, these functional aspects are achieved by a variety of masterbatches. Every other day, there is a demand for a new type of masterbatch from the brand owners / converters.

Q. Your views on a vertical that is a fast-emerging sector for your business growth.

In the current scenario, practically every vertical is offering a very good opportunity to grow. However, a few verticals like flexible packaging, home appliances, white goods and agriculture have immense potential where growth is

“JJ Plastalloy will showcase ‘NIR Detectable Masterbatches’ which help the industry to sort and recycle ‘black articles’ very easily, ‘Thermal Stabilizer Masterbatches’ for quality maintenance in recyclates and the entire range of masterbatches for the flexible packaging industry,” shares Shivam Bansal, in dialogue with POLYMERS Communiqué.

perceived. Knowing the fact that the entire world needs more and more food to satisfy the growing demand with the same natural resources, plasticulture has a very crucial role to play. The goal of ‘More Crop Per Drop’ is being adopted across the world. All the functional aspects of plasticulture, be it mulch film, drip pipes or pond liners, are being achieved with the use of the right masterbatches only. Hence, we are very bullish on this vertical.

Masterbatches Related To Circular Economy And Sustainability Drive The JJ Plastalloy Showcase This ArabPlast

Shivam Bansal, Director, JJ Plastalloy Pvt. Ltd.

continued from page 9

Q. The inclusion of recyclates as feedstock is a norm now adopted by most manufacturers who follow sustainability and circular economy. Your comments on any challenges that you face or modifications that are warranted in your production process.

Circular economy has become the need of the hour and no polymer processor can remain aloof from

it. Everyone has to remain equally committed to this concern so that the beauty of plastic as a material of construction is sustained for many years to come. As an integral part of our business strategy, we have installed a recycling unit at our Gujarat unit and recycle entire waste / specimens generated here. This recyclate is used in a few of our products, ensuring the performance aspects are not compromised.

Q. Globalization opportunities for Indian masterbatch manufacturers...

In the present day scenario, exports of 'Made in India' masterbatches have made a name for themselves. We are able to differentiate our products from the rest of the world. Our masterbatches are very much respected and appreciated by the end users. Going by the huge thrust of our Government to promote 'Make in India', I am sure the world is our market and we are working very seriously in this direction.

Q. Your showcase at ArabPlast that could excite the visitors...

At ArabPlast, we are going to showcase a lot many products related to circular economy and sustainability. We are going to showcase 'NIR Detectable Masterbatches' which helps the industry to sort and recycle 'black articles' very easily. Apart from this, we are coming up with 'Thermal Stabilizer Masterbatches' which help the recyclers to maintain the quality of recyclates over repeated heating cycles. Additionally, we are showcasing our entire range of masterbatches for the flexible packaging industry which includes co-extrusion multilayer films, cast films and various other applications.

ArabPlast 2023: Your Exclusive Invitation To Explore The Future Of Innovation And Business In Plastics And Beyond

Nadhah Mohamed Kadar, General Manager, Al Fajer Information and Services
continued from page 1

in the UAE for hosting some of the earliest trade fairs in the region, helping promote trade and economic activity.

Al Fajer's credentials include the Middle East's largest trade show dedicated to the plastics, recycling, petrochemicals, packaging and rubber industry, titled ArabPlast, set to return for its 16th edition today, December 13, 2023. Paper Arabia and Petworld Arabia shows too are quickly gaining popularity.

These exhibitions draw global participants, establishing Dubai as a premier trade hub and business destination. More so, the shows serve as a platform for businesses to showcase products, network with potential partners and explore investment opportunities.

Al Fajer has evolved over the decades to excel not only in exhibition organization, but also in stand construction and event management. Its diverse services include collaborations with prestigious clients such as Messe Düsseldorf, Messe Frankfurt, Dubai

Electricity and Water Authority, and Sharjah Expo Centre, to name a few.

Q. Your views on the current business trends in the MEA region typically in the plastics sector as compared to the rest of the world.

The MEA region's plastic sector trends are currently aligned with the rest of the world, especially regarding the focus on sustainability and environmental responsibility.

Like the rest of the world, the MEA region's increased plastic consumption was driven by population growth and urbanization which led to an increased demand for plastic products in various industries like packaging, construction, automotive, healthcare and more.

The UAE has made substantial investments in plastic research and innovation, leading to the development of high-standard complexes for sustainable and advanced plastic manufacturing technologies, including bioplastics.

Over the last couple of years,

sustainability has been the focus area of the plastics sector, and the UAE is implementing initiatives to reduce plastic waste and promote recycling.

Q. With changing times, how do you visualize a trade exhibition of the future?

While the traditional emphasis on the social element of networking and face-to-face interactions remains prominent, in the future, trade fairs will evolve. In my understanding, the trade fairs will be more technologically driven with the use of artificial intelligence that will gather people together from all over the world. They will focus on a mix of virtual and in-person events to make it more economical and easier for people from all over the world to join.

Q. ArabPlast in its 16th edition, your message for the exhibitors / visitors. Why

The UAE has made substantial investments in plastic research and innovation, leading to the development of high-standard complexes for sustainable and advanced plastic manufacturing technologies, including bioplastics. Over the last couple of years, sustainability has been the focus area of the plastics sector, and the UAE is implementing initiatives to reduce plastic waste and promote recycling.

do you see it as a business enabler?

We wholeheartedly welcome all exhibitors and visitors to ArabPlast, the region's premier plastics, recycling, petrochemicals, packaging and rubber industry event. ArabPlast serves as a catalyst for business success, going beyond being just an exhibition! It's a unique platform where industry pioneers converge, innovations thrive and alliances are forged. We are happy to gather all the attendees on one platform as part of this dynamic trade fair and wish them all success.

Explore a wide range of flexible packaging solutions at our stand 6D145 in Hall 6 where we are showcasing our brief history, evolution of IPAK as a market leader in Pakistan with ambitions to become global, our growth forecast and vision and commitment towards sustainability.

Also our product portfolio and new innovations, tailored to all your packaging needs for BOPP, BOPET, CPP and Metallized films.

Save the date for our special presentation on the 2nd day by Mr. Muhammad Asad Ullah Butt, Group Head R&D where he will be speaking on "Enhancing Metallized Film Performance through Recipe Modification and Process Optimization" at 11:00 am.
