OQ's Principal Sponsorship to ArabPlast 2023 Showcases Its Commitment to Driving the Downstream Polymer Industry

We, at OQ, extend our warmest congratulations to the 16th edition of ArabPlast, the foremost platform for the plastics, recycling, petrochemicals, packaging and rubber industry in the Middle East region. ArabPlast continually evolves to mirror our dynamic industry. It is our collective responsibility to foster sustainability and protect our environment for future generations.

OQ's principal sponsorship showcases our commitment to driving the downstream polymer industry. Our polymer facilities in Sohar are operating at peak efficiency, expanding our portfolio to include new polypropylene

“ In our commitment to progress, we are happy to announce Ladayn Polymer Park, a pioneering initiative in partnership with Madayn, primed to redefine Oman's polymer industry. As the first and only industry-specific innovation space in the Sultanate, it unites sector businesses into a dynamic ecosystem. ”

SOLUTIONS FOR TOMORROW

NEXT LEVEL EXTRUSION LINES for laboratory, pilot applications or production

- ▶ Blown film lines, flat film lines, stretching lines
- ▶ Extruders, compounders, platen presses, roll mills, calenders
- ▶ Winders, pelletizers, tube & strand lines
- ▶ Pressure filter tests, rheometers & optical inspection systems

“

We are very excited about the show. This is the first time after COVID that we are in such a large group. The location of the ArabPlast exhibition is very nice as it has visitors from Asia, Africa, Europe and Dubai. This is indeed a very interesting show for us.

Dr. Sascha Witt
CSO and Managing Director,
Windmüller & Holscher

It is a really good show. We are delighted to have so many people coming in.

To add, we are starting a plant in Saudi Arabia. That's the big highlight for us here. Indeed, we are very happy to be a part of ArabPlast 2023!

Akhter Aman
Deputy CEO,
EnerPlastics L.L.C.

Innovate • Integrate • Implement

ArabPlast 2023

A Visual Delight!

In the vibrant landscape of industrial innovation, Advanced Petrochemical Company (Advanced) marked its grand entry on October 1, 2005, as a closed joint stock company. Armed with a staggering capital of SR 2,600,000,000 and a prestigious listing on the Saudi Exchange in 2006, Advanced embarked on an exhilarating mission to redefine the petrochemical industry. It was not just high ambitions for the company, but laser-focused: to lead the charge in manufacturing plastics in primary forms and to boldly invest in a diverse spectrum of industrial projects, spanning from petrochemicals and chemicals to the exciting frontiers of renewable energy, both within the energetic realm of Saudi Arabia and beyond.

The year 2005 witnessed a pivotal chapter in Advanced's saga, as the company began the monumental task of constructing its integrated petrochemical plants in Jubail Industrial City, a move that resonated powerfully in Saudi Arabia's Eastern Province. By 2008, the air in these facilities buzzed with success as the polypropylene facility roared to life, boasting an awe-inspiring annual production capacity of 455,000 tons

impact copolymers (ICP) to increase our ability to combat food waste. We are also promoting a cutting-edge Luban LL8446.21, that can be used for water tank production to support water preservation and distribution. These advancements position us to contribute significantly to regional and global industry growth, ensuring an uninterrupted supply chain for our valued partners.

In our commitment to progress, we are happy to announce Ladayn Polymer Park, a pioneering

initiative in partnership with Madayn, primed to redefine Oman's polymer industry. As the first and only industry-specific innovation space in the Sultanate, it unites sector businesses into a dynamic ecosystem. This collaboration, in partnership with industry leaders, brings converters, recyclers, developers, waste experts, R&D institutions and additive suppliers together under one roof.

As we embark on this transformative journey, our industry's strength lies in our partnerships.

Together, we generate an 'energy beyond limits', propelling us to overcome challenges, seize opportunities and pave the way for a sustainable, prosperous future. Every type of business, from startups to large enterprises, will be valuable in making a difference and attracting polymer-related industry experts, spanning packaging, construction, infrastructure and healthcare. Together, we can house the full lifecycle of plastics, enhancing circularity from research and production to supply, waste management and recycling.

COLLIN to Maximize ArabPlast 2023 as a Platform to Connect With Customers Globally

Corné Verstraten
CSO / Joint Partner,
COLLIN Lab & Pilot
Solutions GmbH

Q. What kind of intelligence can be incorporated into your machines of tomorrow?

We are already in the middle of tomorrow's solutions; for example, we recently presented a press with self-learning AI control - Press P 300 S-AI. It is ergonomic and space-saving. The high-performance servo hydraulics ensures quiet operation, highly precise pressure control and low energy consumption. Due to this concept, cooling water is not required for the hydraulics.

The control has an embedded artificial intelligence that generates a digital twin, exactly defining and storing the control for the physical conditions of the press and the used materials. During the operation, the machine learns and optimises the processes continuously. Thus, customers save adjustment and start-up time, and can quickly retrofit tools.

"Advanced AI-integrated machines from Collin like Press P 300 S-AI are revolutionizing industry standards with efficiency, precision and sustainability," highlights Corné Verstraten, in dialogue with POLYMERS Communiqué.

Q. How do you visualize the Asian and the Middle East markets for your business? Are there any specific strategies for the region or any specific market segments that might be on your radar?

We cover these areas very well through our branches in Chennai and Singapore with our worldwide representatives and, of course, with the COLLIN sales team.

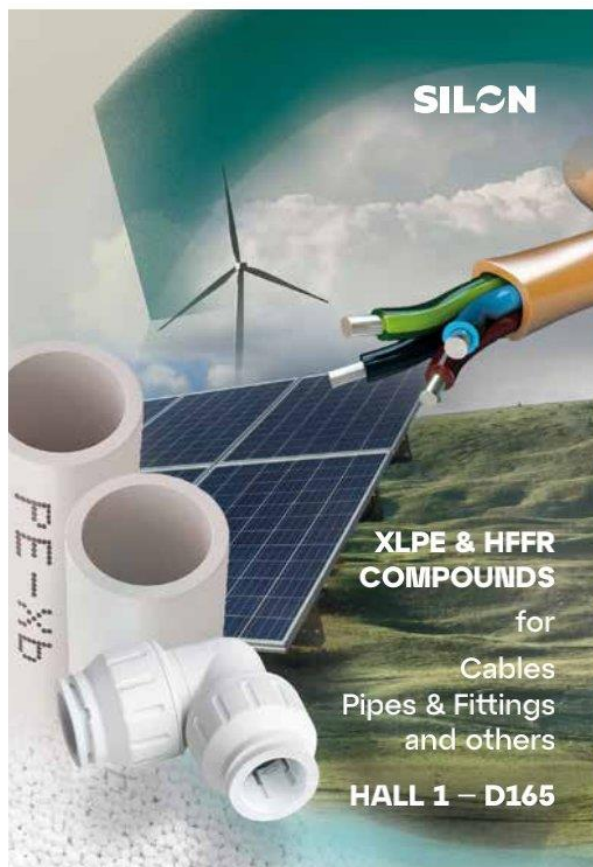

India, for example, is the fastest-growing market for the polymer industry, especially for masterbatches, compounding as well as blown and cast film production. It is a fact that local plastic processing companies are upgrading their production infrastructure with new technologies that meet global standards.

Besides that, we have also observed a shift in the way businesses think. There is still an increased emphasis on quantity, but without compromising on quality.

Q. Do you see any changing market demands of processors from a typical pilot and lab lines, something that could impact your business?

Sustainability, as a factor, is beginning to play a big role. This means that a trial cannot be done on a production line as the costs (energy, production time, manpower, waste production etc.) are too high. That is why we see the inquiries for pilot lines are increasing, and we should not forget one important factor i.e. the time to market.

COLLIN to Maximize ArabPlast 2023 as a Platform to Connect With Customers Globally

Corné Verstraten, CSO / Joint Partner, COLLIN Lab & Pilot Solutions GmbH
continued from page 7

Q. Could you provide us with an insight into your technical centre and its salient features that enhance customer experience?

The COLLIN technical centre is equipped with state-of-the-art machines with the latest developments and a modular set-up to perform customer trials. A team of experts from different fields carry out trials with all kinds of materials and optimize processes. That apart, our test centre is also used to test our new developments.

Q. What is COLLIN's showcase going to be like at ArabPlast 2023? Any new product or technology that you plan to demonstrate at the booth?

We have no machines being displayed at ArabPlast this year, but we will use this exhibition as a big meet-and-greet place to connect with customers from India, the Middle East and other parts of the world.

We extend a warm welcome to all visitors at our booth during ArabPlast 2023!

Kampf and Atlas - Comprehensive Portfolio Presented at ArabPlast

Kampf GmbH and Atlas Converting, the slitting and winding specialists, will showcase their comprehensive portfolio for the flexible film and packaging industry at ArabPlast. Visitors to the booth will experience primary slitting machines such as the Atlas ProSlitter BlackLine with features that enable optimal processing of BOPP, the increasingly important BOPE and other materials. The Kampf PrimeSlitter BlackLine for maximum flexibility with a high degree of automation will not only inspire BOPET producers. Anyone interested in the converting industry can learn more about the corresponding machines.

The Kampf ConSlitter and the Atlas TitanSlitter.

Explore Kampf GmbH and Atlas Converting's cutting-edge slitting and winding solutions at ArabPlast, enhancing flexibility and efficiency for BOPP, BOPE and BOPET processing in the converting industry.

The ConSlitter and TitanSlitter series are characterized by high flexibility and offer the right solution for every application in the converter industry. Digital service solutions optimize production. Together, Kampf and Atlas offer seven service locations around the world and a significantly expanded service team that continues to grow in knowledge and experience.

Join us at ArabPlast, Booth 2 C 120. We look forward to welcoming you!

continued from page 5

of propylene and 450,000 tons of polypropylene.

The company's visionary path then led to the groundbreaking Propane Dehydrogenation project, a venture aiming to nearly double Advanced's size by Q3 2024. This ambitious endeavor, getting together CATOFIN Technology with Advanced's polypropylene plants leveraging LyondellBasell technologies, is set to conjure specialized polypropylene grades, propelling Advanced into the stratosphere of industry leadership.

Showing excellence at ArabPlast: Advanced's commitment to innovation and global connectivity in petrochemicals.

Advanced's debut at this ArabPlast showcases a dazzling array of high-quality products, and also a thrilling opportunity to forge deep, meaningful connections with customers. Representing Saudi Arabia, the company felt an electrifying sense of pride and responsibility to uplift the vast array of businesses from their homeland. This showing is a vibrant testament to Advanced's unwavering commitment and unity with the Saudi business community.

Milacron India Unveils Advanced Plastic Processing Solutions at ArabPlast 2023

Prepare to witness the forefront of plastic processing innovation showcased by Milacron India at ArabPlast 2023. Join us at Hall 5, Booth No. 5D-100 to experience live demonstrations of Q-Accupack 230, setting new benchmarks for precision and efficiency.

Our wide-ranging solutions cater to various industries including packaging, construction, medical, white goods appliances and more. We offer high-performance machines that streamline production, ensuring both accuracy and cost-effectiveness.

Explore how our state-of-the-art plastic processing technology is reshaping products, creating captivating designs that leave a lasting impact.

We invite you to experience the future of plastic

processing with us. Hall 5, Booth No. 5D-100 awaits your presence, offering an immersive journey through innovation, technology and endless possibilities with Milacron.

Embark on the path to success with Milacron: Where we shape what matters for tomorrow.

This is the first time that we are here at ArabPlast and the response is very good. We, at YIZUMI, are showcasing turnkey solutions. I'm happy that the participants are very excited about our showcase.

IPAK
Bridging Innovation

Join us at ArabPlast

IPAK is excited to announce its participation in Arabplast 2023, scheduled from December 13 to 15, 2023, at the Dubai World Trade Centre.

We invite you to visit our stand at 6D145 in Hall 6, where we will be showcasing our short but tremendous success and growth journey, sharing insights into IPAK's global expansion plans through **IPAKCONNECT**, and presenting our forward-looking approach to sustainable packaging solutions.

Be sure not to miss our special presentation on the second day of the event by our very own Mr. Muhammad Asad Ullah Butt. He will be speaking on "Enhancing Metallized Film Performance through Recipe Modification and Process Optimization" at 11:00 am.

We look forward to welcoming you and valuable discussions on your sustainable flexible packaging requirements be it food, labels or industrial.

Save the dates, our booth details and ensure not to miss visiting us at the Arabplast 2023!

IPAK: Transforming the Flexible Packaging Industry With Its BOPP, BOPET, CPP and Metallized Films

IPAK, headquartered in Karachi, embarked on its journey in 2017 as a visionary greenfield project, focused on the production of top-tier 'BOPP' packaging films in Lahore. Its state-of-the-art manufacturing facility spans across approximately 7 acres of land, boasting cutting-edge machinery sourced from renowned global engineering giants like Brückner Maschinenbau (Germany), BOBST (United Kingdom) and KAMPF (Germany).

While a relatively young player in the industry, IPAK exhibits immense growth potential. Its core mission is to deliver exceptional quality packaging films to both local and international markets. To expand its horizons, IPAK strategically formed three new subsidiaries, CPAK, PETPAK and GPAK aiming to position itself as Pakistan's sole flexible packaging group, offering comprehensive solutions for BOPP, BOPET and CPP packaging films.

With all the new equipment in operation, IPAK is on track to become Pakistan's largest packaging films manufacturer by FY 2024, featuring capacities of 100 KT for BOPP (2 lines), 40 KT for BOPET (1 line), 7.2 KT for CPP (1 line) and 25 KT for metallized films (3 machines, including a cutting-edge 3.65 m line with Alubond and AIOx capabilities).

Simultaneously, IPAK made its international foray by exporting its products and establishing a solid reputation for quality, reliability and innovation. This expansion was achieved through its subsidiary, IPAK Connect, with a base in Dubai, United Arab Emirates dedicated to serving global markets and fostering growth. This strategic move allows IPAK to broaden its global presence and reach new horizons in the world of packaging.

IPAK, set to be Pakistan's largest packaging films manufacturer by FY 2024, has made its international foray through its subsidiary, IPAK Connect, based in Dubai.

This is the second time that we are participating at ArabPlast and the first day itself was way more packed than we thought it would be. We always have very high expectations from ArabPlast. As it's always, we think it is one of the most important events here in the region.
